

MUHAMMED JALAL K

Software Developer Internship

muhammedjalal928@gmail.com | +91 7356396080 | Malappuram, Kerala (open to Calicut) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Recent Computer Science graduate with hands-on experience building and maintaining backend applications in Python and Django, including REST APIs and SQL-based data layers on MySQL, PostgreSQL, and MongoDB. Comfortable writing clean, maintainable code, designing relational schemas, and troubleshooting issues across the stack. Strong OOP and DSA fundamentals from academic coursework and practical training; currently building proficiency in Java alongside Python. A collaborative, detail-oriented problem solver eager to contribute to a software development team.

CORE TECHNICAL SKILLS

Programming: Python, Java (currently building proficiency), C, C++

Backend: Django, Django REST Framework, Application Programming, REST API design & testing (Postman)

Databases: MySQL, PostgreSQL, MongoDB — schema design, SQL (SELECT/JOIN/GROUP BY), ORM & migrations

Frontend: JavaScript, React.js

Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, Exception Handling, Problem-Solving & Analytical Skills

Tools & Practices: Git/GitHub, Postman, Debugging & Troubleshooting, Code Review Participation

TRAINING & PRACTICAL EXPERIENCE

Full Stack Python Django with React — On-the-Job Trainee

Feb 2025 – Dec 2025

OneTeam Calicut

- Built and tested full-stack features end to end in Python/Django, applying OOP principles for reusable, well-documented backend components.
- Designed database schemas and wrote SQL queries and ORM migrations across PostgreSQL, MySQL, and MongoDB.
- Tested REST API endpoints with Postman and documented issues, assumptions, and resolutions as part of the SDLC, collaborating closely with peers in a client-project-style workflow.

PROJECTS

CivicConnect — AI-Based Complaint Management System

Python, Django REST Framework, MySQL, React.js

- Designed the MySQL data layer and a Django REST API with JWT auth and role-based access, applying OOP design principles.
- Implemented automatic classification logic in core Python to route complaints without manual triage.
- Deployed backend on Render and frontend on Vercel with tested, maintainable code.

Employee Leave, Attendance & Salary Management System

Python, Django REST Framework, React.js

- Designed the database schema and built a full-stack HR system covering leave, attendance, and salary computation, handling environment setup and end-to-end debugging.

Product Inventory and Stock Management System

Python, Django REST Framework, PostgreSQL, React.js

- Built a full-stack inventory and stock management system on a PostgreSQL data layer with a Django REST API and React frontend.

EDUCATION

Bachelor of Science in Computer Science

Jun 2022 – Mar 2025

Blossom Arts and Science College, University of Calicut

Full Stack Python Django with React — Certification, OneTeam Calicut (Feb 2025 – Dec 2025)
